

1.5-Inch 40mm Speaker - 4 Ohm 2W with Neodymium Magnet

Slug: 1-5-inch-40-mm-4-ohm-3w-speaker-woofer

TECHNICAL SPECIFICATIONS & SUMMARY

[Speakers] 1.5-Inch 40mm Speaker - 4 Ohm 2W with Neodymium Magnet The 1.5-Inch 40mm Speaker with Neodymium Magnet is a compact and lightweight audio driver designed for DIY electronics, portable speakers, multimedia devices, toys, alarms, embedded systems, and other space-constrained audio applications. Featuring a neodymium magnet, this speaker provides a compact magnetic structure while maintaining efficient audio performance. With a 40mm (1.5-inch) speaker size, 4 Ohm impedance, and 2W power rating, it is suitable for small audio amplifier projects and compact electronic devices. Its lightweight construction makes it particularly suitable for portable applications where space and weight are important considerations. Key Features 40mm (1.5-Inch) speaker size 4 Ohm impedance 2W power rating Neodymium magnet Compact and lightweight design Clear and balanced sound output Suitable for low-power audio applications Easy to integrate into compact enclosures Ideal for DIY and embedded electronics Suitable for portable audio devices Technical
