

110 x 69mm 5V 180mA Mini Solar Panel Cell Module

Slug: 110-x-69mm-5v-180ma-mini-solar-panel-cell-module

TECHNICAL SPECIFICATIONS & SUMMARY

[Solar Panel] 110 x 69mm 5V 180mA Mini Solar Panel Cell Module (0.9W) 5V Output - 180mA Current - 0.9W Power - Polycrystalline Solar Cell - Compact & Lightweight The 110 x 69mm 5V 180mA Mini Solar Panel Cell Module is a compact and efficient photovoltaic module designed to convert sunlight into clean, renewable electrical energy. Delivering a stable 5V output with a maximum current of 180mA, this solar panel is ideal for powering low-power electronic devices, DIY solar projects, battery charging applications, and educational experiments. Built using high-quality polycrystalline silicon solar cells, the module offers efficient energy conversion while maintaining reliable performance under sunlight. Its lightweight construction and compact dimensions make it easy to integrate into portable devices, robotics projects, solar-powered gadgets, and outdoor applications. Designed for durability, the panel features a weather-resistant construction suitable for outdoor use. With pre-drilled mounting holes, installation is quick and convenient for a wide range of renewable energy
