

18650X1 Single Battery Cell Holder/Case with Wire

Slug: 18650x1-single-battery-cell-holder-case-with-wire

TECHNICAL SPECIFICATIONS & SUMMARY

[Lithium Battery Holder] The 18650 Single Battery Holder with Wire is a compact and reliable battery case designed for one 18650 lithium-ion cell. It provides a secure battery connection and makes it easy to integrate rechargeable batteries into electronic projects. In addition, the holder comes with pre-attached wires for quick and simple connections. As a result, users can easily connect the battery holder to circuits, modules, and DIY electronics without additional soldering work. Because of its durable plastic construction, the holder protects the battery while maintaining stable electrical contact. Furthermore, the lightweight design makes it suitable for portable and battery-powered applications. The holder is widely used in DIY battery packs, robotics projects, LED lighting systems, power banks, IoT devices, and electronics prototyping. Key Features Supports 1 x 18650 lithium-ion battery Pre-attached connection wires Durable plastic battery holder Compact and lightweight design Easy battery installation and removal Stable electrical contact Suitable for DIY electronics projects
