

19S 2Amps Active Balancer Equalizer for LifePO4 Lithium Phosphate Battery

slug-19s-2amps-active-balancer-equalizer-for-life-po4-lithium-phosphate-battery

TECHNICAL SPECIFICATIONS & SUMMARY

[Lithium Battery Protection Board] An active balancer or equalizer, balance you cells all the time during discharge and charge and maintain same voltage level along with the whole battery, Provides a lot better back up and mileage than a normal battery pack. Connect the balancer along with the bms Module. Balancer does not do work of BMS, make sure BMS and balancer both are different. Balancer make battery balance and give more back up and mileage, and helps your battery to maintain the long life. You can use this balancer to Any ah battery like 12ah, 18ah or 50ah 100ah etc. Balancer Specification - Suitable - 19S LifePO4 48volt Operating voltage range: 2.8v to 3.65volt Balance current: 2Amps Max Adjacent voltage difference is 0.1V or more (current is about 0.5-0.7A); Adjacent voltage difference is above 0.2V (maximum balance current is 2A); The smaller the differential voltage, the smaller the balance current. other Info Product Dimensions - 92 x 85 x 8 mm Item Weight - 122grm Wire length - 60cm Package Include - 1. Balancer Unit 2. Balancer Wires
