

2.25-Inch 8ohms 8W Full Range Speaker for Compact Audio Applications

5019-2.25-Inch-8ohms-8W-full-range-speaker-for-compact-audio-applications

TECHNICAL SPECIFICATIONS & SUMMARY

[Speakers] 2.25-Inch 8 Ohm 8W Full Range Speaker for Compact Audio Applications The 2.25-Inch 8 Ohm 8W Full Range Speaker is a compact and efficient audio driver designed for small electronic and embedded sound applications. Featuring an 8 Ohm impedance and 8W power rating, this speaker delivers clear and balanced sound output while maintaining low power consumption and excellent efficiency. Its compact size makes it ideal for projects where installation space is limited, including portable speakers, DIY electronics, toys, alarm systems, intercom devices, and mini speaker enclosures. The full-range design allows it to reproduce a broad range of audio frequencies, making it suitable for both voice and music playback applications. Built with durable materials and designed for reliable long-term performance, this speaker is an excellent choice for electronics hobbyists, engineers, and product developers working on custom audio projects.
