

32650/32700 3.2V Rechargeable 6000mAh LifePO4 Battery Cell for Solar

32650/32700 3.2V Rechargeable 6000mAh LifePO4 Battery Cell for Solar

TECHNICAL SPECIFICATIONS & SUMMARY

[LiFePO4 Battery Cell] The 32700 / 32650 3.2V 6000mAh LiFePO4 Battery Cell is a high-performance rechargeable lithium iron phosphate (LFP) battery designed for applications requiring stable voltage, long cycle life, and high current capability. With a massive 6000mAh capacity, this cylindrical battery provides reliable and long-lasting power for solar systems, RC transmitters, DIY battery packs, portable devices, backup systems, and industrial applications. LiFePO4 chemistry offers superior safety, thermal stability, and longer cycle life compared to traditional lithium-ion batteries. Datasheet: [Click here](#) Key Features Nominal Voltage: 3.2V High Capacity: 6000mAh Lithium Iron Phosphate (LiFePO4 / LFP) chemistry Long cycle life (2000+ cycles typical) High thermal stability & improved safety Low self-discharge rate Flat-top design Suitable for high-drain applications Technical Specifications Battery Type: LiFePO4 (Lithium Iron Phosphate) Model Size: 32700 / 32650 Nominal Voltage: 3.2V Fully Charged Voltage: 3.6V - 3.65V (Not 4.2V) Capacity: 6000mAh Discharge Cutoff Voltage: 2.5V Cycle Life:
