

3.7V 1000mAh Li-Po Battery (503035P) - High-Quality Rechargeable Lithium Polymer Single Cell

Slug: 3.7v-1000mah-li-po-battery-503035p-high-quality-rechargeable-lithium-polymer-single-cell

TECHNICAL SPECIFICATIONS & SUMMARY

[LiPo Cell] The 3.7V 1000mAh Lithium Polymer Battery (503035P) is a premium, high-performance rechargeable Li-Po cell designed for compact and portable electronics. Offering stable 3.7V output with excellent energy density, this lightweight battery is perfect for IoT devices, GPS trackers, Bluetooth gadgets, robotics projects, MP3 players, and various DIY electronics. Built using high-quality polymer materials, the 503035P battery ensures long cycle life, steady power delivery, and enhanced safety. With a built-in protection circuit module (PCM), it safeguards against overcharging, over-discharging, and short circuits-making it a reliable and safe power source for modern electronics that demand stability and durability. Whether you're replacing an old battery or developing a new portable device, this 3.7V 1000mAh Li-Po cell delivers dependable performance in a slim and compact form factor. Features High-performance 3.7V Li-Po cell with 1000mAh capacity for long-lasting power Compact 503035P form factor perfect for space-restricted designs Stable and reliable voltage
