TECHNICAL SPECIFICATIONS & SUMMARY

[Terminal Connector] 3 Pin 5.08mm Pitch Plug-in Screw Terminal Block Connector The 3 Pin 5.08mm Pitch Plug-in Screw Terminal Block Connector is a compact and reliable electrical connector designed for securely connecting wires to PCBs. Its plug-in design allows convenient connection and disconnection while the screw terminals provide a firm and stable grip on the connected wires. Made with a durable PBT (Polybutylene Terephthalate) housing, the connector offers good mechanical strength, heat resistance, and electrical insulation. The terminal contacts are made from nickel-plated brass, while the pin header uses tin-plated brass for reliable electrical conductivity and corrosion resistance. The compact and lightweight design makes this terminal block suitable for power connections, control circuits, industrial electronics, DIY projects, and PCB-based applications. Key Features 3-pin plug-in screw terminal block 5.08mm pin pitch Secure screw-type wire connection Easy plug-in and removal design Tin-plated brass pin header Nickel-plated brass contacts Durable PBT housing Good electrical
