

5mm LED Holder Chrome Metal Silver open type

Slug: 5mm-led-holder-chrome-metal-silver-open-type

TECHNICAL SPECIFICATIONS & SUMMARY

[LED Holder and Connector] The 5mm Open Type Chrome Metal LED Holder is designed for mounting standard 5mm LEDs in electronic panels and project enclosures. Its open-front design allows the LED to remain clearly visible while providing secure support and a professional finish. Made from durable chrome-plated metal, this holder offers better strength and long-lasting performance compared to standard plastic holders. In addition, the polished silver finish improves the appearance of LED indicators in DIY and industrial projects. Because of its compact panel-mount design, the holder is easy to install in amplifier panels, battery indicators, control boxes, and custom electronic enclosures. Furthermore, it helps keep LEDs aligned securely during operation. This holder is widely used in DIY electronics, audio amplifiers, robotics projects, battery systems, and indicator light applications. Key Features Compatible with standard 5mm LEDs Open type front design Durable chrome-plated metal body Silver polished finish Secure panel mount fitting Professional appearance Easy
