TECHNICAL SPECIFICATIONS & SUMMARY

[Drone Motor] The A2212 10T 1400KV Brushless Motor for Drone is best compatible or used with SimonK 30A ESC and 1045 Propeller Set. This 1400KV brushless motor is equipped with a solid metal case which makes it reliable and durable. The A2212 10T Motor comes with a pre-soldered good-quality connector for a fast and direct connection between ESC and the motor. Application : Drones Quadcopters Multirotors RC Airplanes UAV Motor KV (RPM/V) 1400 Motor Type Brushless Motor Compatible LiPO Batteries: 2S to 3S Model No.: A2212 10T Shaft Diameter (mm): 3.17 Current Capacity (A) 16 Max. Efficiency Current (A) 6 ~ 12 No-Load Current (mA) 700 Maximum Efficiency 0.8 Length (mm): 27.5 Weight (g): 72 Width (mm): 27 Shipping Weight 0.078 kg Shipping Dimensions 12 x 6 x 5 cm Features : The steel design is capable of withstanding competition conditions. Lightweight design makes them suitable for a wide range of Quadcopter and Hexacopter Frames. Compact size. Offers great performance and value for money. Smooth throttle response for best RC
