

DC 12V 60RPM Gear Motor Centre Shaft DC Geared Motor Heavy Duty Motor for Robotics

Slug: dc-12v-60rpm-metal-geared-motor

TECHNICAL SPECIFICATIONS & SUMMARY

[Gear Motor] Description: This 12V 60RPM Gear Motor for robotics applications. This 12V 60RPM Gear Motor is very easy to use and available in standard size. Nut and threads on shaft to easily connect and internal threaded shaft for easily connecting it to wheel. Based on the gearbox design the RPM and Torque of the motor will vary. Specifications: Operating Voltage: 12V DC Stall Torque: 0.5kgcm torque No-load Current: 60 mA(Max) Load urrent: 300 mA(Max) Features: Easy to connect with Pully, Wheel, and rotary with M3 thread hole. Long Gearbox shaft provides displacement with machine application. 12V 60RPM Gear Motor provides very high torque, applicable in spindle motor also. Package Included: 1 x 12V 60RPM Gear Motor Centre Shaft DC Geared Motor Heavy Duty Motor for Robotics
