TECHNICAL SPECIFICATIONS & SUMMARY

[Power Connector] DC 5.5 x 2.1mm Female Power Jack Socket Panel Mount Connector Panel Mount - 5A Current Rating - Silver-Plated Contacts - Durable & Reliable The DC 5.5 x 2.1mm Female Power Jack Socket is a high-quality panel mount DC power connector designed for reliable DC power connections in electronic equipment and DIY projects. It features a standard 5.5mm outer diameter and 2.1mm inner diameter, making it compatible with most DC power adapters and barrel plugs. The connector utilizes silver-plated copper alloy contacts to provide excellent electrical conductivity, low contact resistance, and outstanding corrosion resistance. The durable ABS plastic housing offers high mechanical strength and long-lasting performance, while the panel mount design ensures secure installation in enclosures, control panels, and electronic equipment. Designed for frequent use, the connector supports approximately 10,000 insertion and removal cycles, making it suitable for both commercial and industrial applications. Features Standard 5.5 x 2.1mm DC female power jack
