

3A 250V Green Push Button ON/OFF Lock Switch (Self-Locking)

Single green pbs 12a 12mm 2pin self-locking round plastic push button switch

TECHNICAL SPECIFICATIONS & SUMMARY

[Mechanical Switches] 3A 250V Green Push Button ON/OFF Lock Switch (Self-Locking) Self-Locking Push Button - Push ON / Push OFF - 3A 250V Rating - Panel Mount - Green Button The 3A 250V Green Push Button ON/OFF Lock Switch is a compact and durable self-locking push button switch designed for reliable ON/OFF control in electrical and electronic applications. Unlike a momentary push button, this switch features a push ON / push OFF locking mechanism that remains in its selected position until pressed again. Designed for easy panel mounting, the switch features a 12mm mounting hole and a bright green push button for clear identification in control panels and electronic enclosures. Its rugged plastic housing and silver-plated contacts ensure excellent electrical conductivity, stable switching, and long service life. With a rating of 3A at 250V AC, this switch is ideal for industrial equipment, automation systems, robotics, power control circuits, DIY electronics, alarm systems, and various electronic devices. Features Self-locking push button switch Push ON / Push OFF operation
