

High Temperature Kapton Tape 50mm 33 Mtr - Premium Polyimide Insulation Tape up to 300 deg C

Slug: high-temperature-kapton-tape-50mm-33-mtr-premium-polyimide-insulation-tape-up-to-300c

TECHNICAL SPECIFICATIONS & SUMMARY

[Kapton Tapes] The High Temperature Kapton Tape 50mm x 33M - Premium Polyimide Insulation Tape up to 300 deg C is a professional-grade heat-resistant tape designed for demanding industrial, electronics, and engineering applications. Manufactured from high-quality polyimide film with a silicone adhesive, this tape delivers outstanding thermal stability, chemical resistance, and electrical insulation-making it an essential tool for soldering, 3D printing, lithium battery assembly, transformer insulation, and PCB wave solder masking. With a broad temperature tolerance reaching up to 300 deg C, this Kapton tape ensures secure performance without melting, shrinking, or leaving residue. Its 50mm width and long 33-meter roll provide excellent coverage for large surfaces, making it ideal for laboratories, manufacturing units, repair technicians, and DIY electronics enthusiasts. Features: Premium polyimide Kapton tape with silicone adhesive High temperature resistance up to 300 deg C Excellent for PCB solder masking, 3D printer heated beds, and battery insulation Provides strong electrical
