

JUMPER WIRE 40P FEMALE TO MALE 20CM

Slug: jumper-wire-40p-female-to-male-20cm

TECHNICAL SPECIFICATIONS & SUMMARY

[Jumper wires] 40 Pin Male to Female Dupont Jumper Wires - 2.54mm Pitch The 40 Pin Male to Female Dupont Jumper Wire Cable is a flexible and reusable connection cable designed for prototyping, breadboard work and electronic development projects. It is compatible with standard 2.54mm (0.1-inch) pin headers and allows electronic components, development boards and breadboards to be connected without soldering. The cable consists of individual jumper wires with connectors at both ends, making it easy to plug and unplug components during testing, prototyping and circuit development. It is widely useful with Arduino, Raspberry Pi, Banana Pi, development boards, PC motherboards, PCB projects and breadboards. Key Features 40-pin Male to Female jumper wire cable Compatible with 2.54mm pin headers 40 individual jumper wires Multiple colored wires for easy identification Flexible and reusable No soldering required Easy to connect and disconnect Suitable for breadboard prototyping Useful for PCB and development board projects Durable construction
