

Nickel Strip 0.15mm x 6mm 1P Pure Nickel Welding Strip for 18650 Lithium Battery Pack - 1 Meter

Sug. nickel strip 0.15mm x 6mm 1p pure nickel welding strip for 18650 lithium battery pack-1-meter

TECHNICAL SPECIFICATIONS & SUMMARY

[Nickel Strip] The Nickel Strip 0.15mm x 6mm 1P Pure Nickel Welding Strip is specially manufactured for building and repairing 18650 lithium battery packs and other rechargeable battery assemblies. Made from high-purity nickel, this strip offers low electrical resistance, excellent conductivity, and strong spot-welding performance. Its flat 1P plane design ensures uniform current flow and reliable connections between battery cells. The strip is corrosion-resistant and durable, making it ideal for long-term use in power banks, e-bike battery packs, solar storage systems, UPS batteries, and DIY lithium battery projects. Supplied in a convenient 1 meter length, this strip is easy to cut and shape according to your battery pack design.

Key Features

- Made from pure nickel (not nickel-plated steel)
- Size: 0.15mm thickness x 6mm width
- Flat 1P plane strip for uniform current flow
- Excellent conductivity with low internal resistance
- Strong and reliable for spot welding
- Corrosion-resistant and long-lasting
- Easy to cut, bend, and shape
- Perfect for 18650, 21700, 26650 lithium battery packs
