

Self Locking Push Button Switch 2 Pin ON/OFF Tactile Switch

Switch - DC 30V 1.5A Mini Push Tact Switch

slug: self-locking-push-button-switch-2-pin-on-off-tactile-switch-dc-30v-1.5a-mini-push-tact-switch

TECHNICAL SPECIFICATIONS & SUMMARY

[Mechanical Switches] The Self Locking Push Button Switch 2 Pin ON/OFF Tactile Switch is a high-quality mini push switch designed for smooth operation, long-lasting durability, and reliable electrical performance. This compact tactile switch is ideal for electronic devices, DIY projects, toy machines, automation systems, and low-power electrical applications. Designed with a self-locking ON/OFF mechanism, the switch stays engaged after pressing and releases when pressed again, making it convenient for power control and switching operations. Its compact size allows easy installation in small electronic devices and control panels. Built with durable materials and high-quality metal contacts, this switch supports up to DC 30V and 1.5A current, ensuring stable conductivity and dependable operation. The strong plastic body provides excellent insulation and durability for long-term use. This tactile push button switch is suitable for a wide range of commercial, industrial, and DIY electronic applications where compact and reliable switching is required. Key Features Self Locking ON/OFF Push Button
