TECHNICAL SPECIFICATIONS & SUMMARY

[Amplifier Board] TPA3110 Mono Channel Digital Amplifier Board 30W Power Amplifier Module is useful in applications like DIY Bluetooth speaker, home and car audio system modification. Specifications and Features : Amplifier Chip: TPA3110. Working Voltage: DC 8-26V. Output Power: 1 x 30W. Applicable Speaker Impedance: 4/6/8 ohm(8 ohms Best). PCB Board Size: 44 x 30 x 10 (LxWxH)mm / 1.65 x 1.18in. Weight: 10 gm / 0.35oz. DC 8-26V TPA3110 PBTL Mono Digital Amplifier Board AMP Module 1x30W for Arduino. Single-channel digital power amplifier Board PBTL. Mono digital audio power amplifier chip. 30W output and low power consumption. Sound quality is very good by using this module. Applicable speaker impedance: 4/6/8 ohm(8 ohm is the best). Application: DIY Bluetooth speaker, home and car audio system modification. Package Includes : 1 x TPA3110 Mono Channel Digital Amplifier Board 30W Power Amplifier Module.
