

XT60 Male Female Bullet Connector Plug For Lipo Battery RC Drone FPV Racing Multi Rotor

slug-xt60-male-female-bullet-connector-plug-for-lipo-battery-rc-drone-fpv-racing-multi-rotor

TECHNICAL SPECIFICATIONS & SUMMARY

[Power Connector] Product Description The XT60 Connector (Male & Female Pair) is a high-quality, reliable power connector designed for high-current applications up to 60A. Widely used in RC models, drones, battery packs, and power systems, this connector ensures secure and efficient power transfer. Built with gold-plated copper contacts, the XT60 provides low resistance, minimal heat generation, and excellent conductivity, making it ideal for demanding electrical applications. The polarized design prevents reverse connections, ensuring safe and error-free usage. Its durable high-temperature nylon housing and precision-engineered fit guarantee strong, stable connections even under heavy loads and vibrations. Key Features High Current Capacity (60A)Handles continuous high current with excellent performance. Polarized Design for SafetyPrevents incorrect connections and ensures proper polarity. Gold-Plated ContactsProvides low resistance, high conductivity, and reduced heat. Strong & Secure FitPrecision mold design ensures tight, gap-free connections. Improved
